

Quick User Guide - WAI NZ Map

Introduction

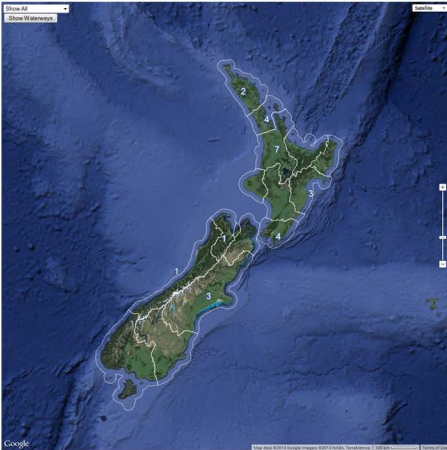

This quick user guide explains how to use the enhanced features of the new WAI NZ map. The key features are:

- Map view type
- Fresh waterways overlay
- Regional filter
- Smart markers

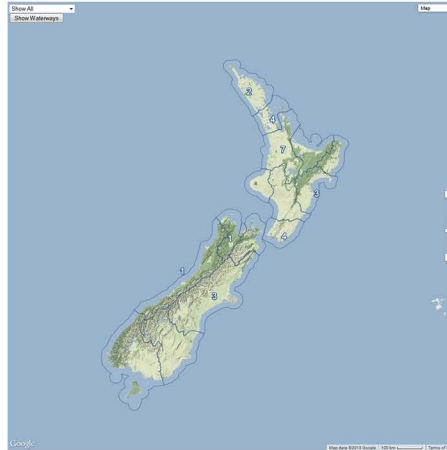

Map Views

The new WAI NZ map gives the user flexibility to choose between three map view types: Map, Terrain and Satellite.

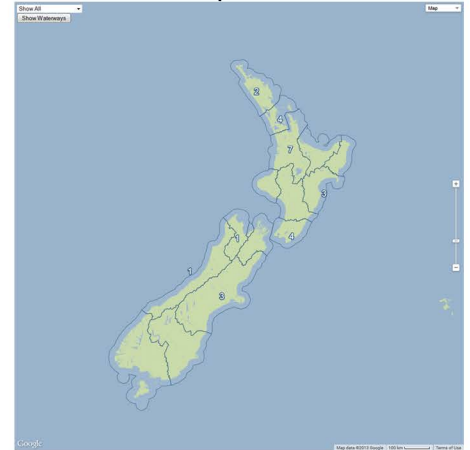

Satellite View

Terrain View

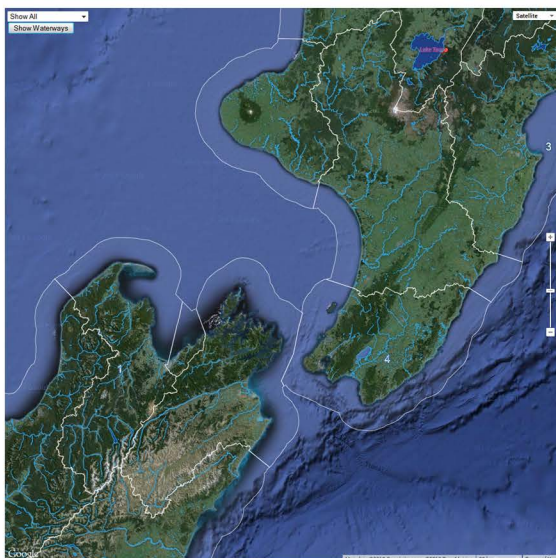

Map View

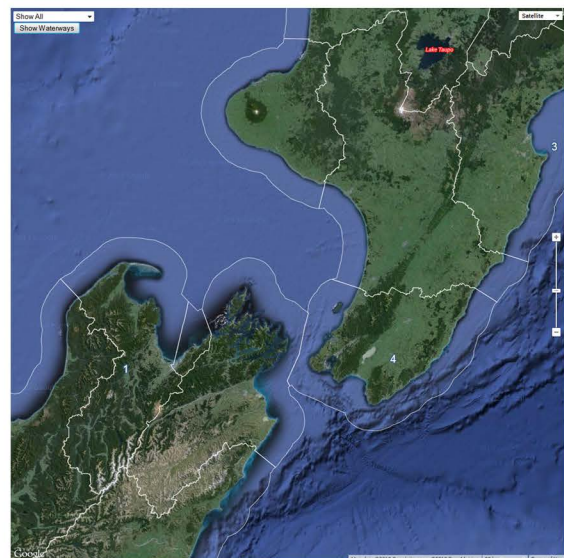

Waterways

Click on the "Show Waterways" button to toggle the rivers and lakes on/off.

Rivers On

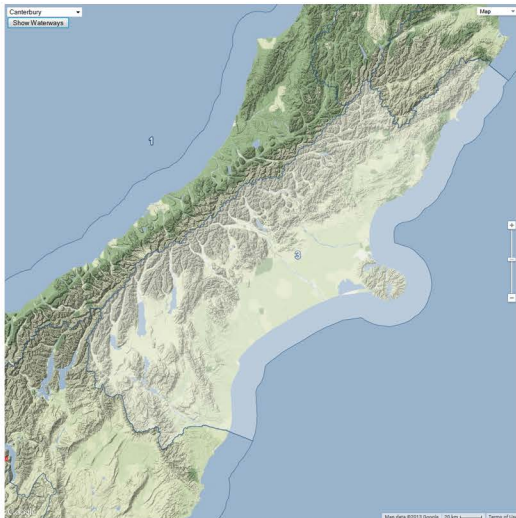

Rivers Off

Markers

To reduce clutter, markers are filtered by region. View markers by following these steps:

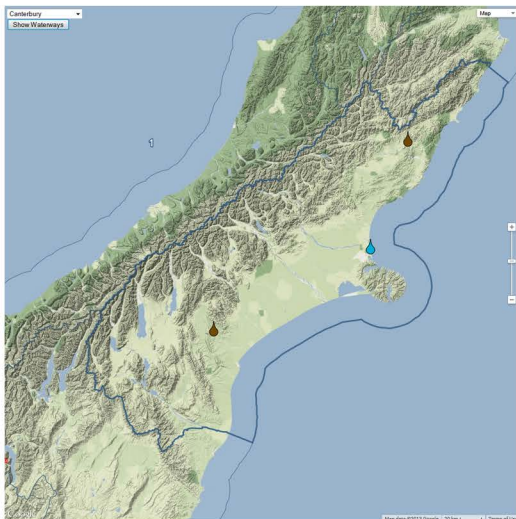

1

Highlight region

Move the mouse over the region to highlight it.

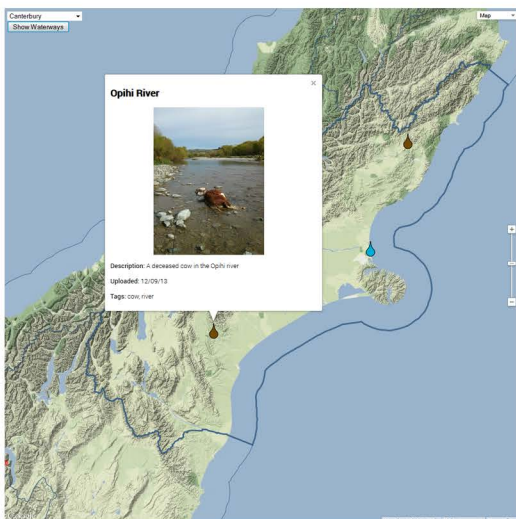

2

Select region

Click on the highlighted region or use the drop-down menu to select it. Notice the markers are displayed and the region boundary is bold. Blue markers indicate clean waterways and brown markers show polluted water.

3

Marker information

Click on the marker to view the photo and information including description, date and tags.
